Special Solutions for Date Palm & Agricultural Farms

About us

Farmdung Exporter, a unit of Abhielite Group Pvt. Ltd., is an international trading company specializing in the export and import of premium organic and agricultural products. We deliver fresh farm produce and sustainable cow dung-based products, ensuring quality, purity, and eco-friendly solutions for global markets.

Headquartered in Warangal, Telangana (India) and operating internationally from London, United Kingdom (E16 1FH), Farm Dung Exporter specializes in the export of 100% pure, organic cow and buffalo dung for agricultural use, composting, and spiritual practices.

Together, Prem and I are proud to lead a company that stays true to our roots while embracing modern innovation — delivering trusted, eco-friendly products that reconnect the world with India's natural resources and promote sustainable farming for a better tomorrow.

Our Vision

To become a global leader in organic and sustainable agricultural products by reconnecting the world with India's natural resources — fostering a future where traditional farming, environmental responsibility, and modern innovation work hand in hand to create lasting positive impact.

Our Mission

To deliver pure, eco-friendly, and reliable organic products to customers across the globe — while upholding the highest standards of quality, supporting rural livelihoods, and promoting sustainable agricultural practices for a better tomorrow.

“Empowering sustainable gardening and farming for a healthier planet”

Our Core Organic Products

1. Cow Dung Cake

Traditional fuel for farming used for plant and enriching date farms.

2. Cow Dung Powder

Natural fertilizer, boosts soil fertility and healthy growth of crops.

3. Cow Dung Herbal Compost

Organic compost, enhances soil health in agricultural farms.

We manufacture and export premium organic fertilizers designed to improve soil fertility, increase crop productivity, and support sustainable agriculture in arid and semi-arid regions, especially for date palm plantations and fruit orchards.

17	Pointed Guard	Net Bag	4	4.1

Gardening Applications

Premium organic cow dung-based fertilizers for home and terrace gardens, nurseries, and landscaping. They naturally boost soil fertility, improve moisture retention and aeration, support beneficial microbes, and strengthen roots without harmful chemicals.

Suitable for flowers, vegetables, fruits, indoor plants, lawns, and ornamentals. Regular use promotes healthy growth, better flowering and yield, and long-lasting, nutrient-rich soil.

Solutions for Date Palm Plantations

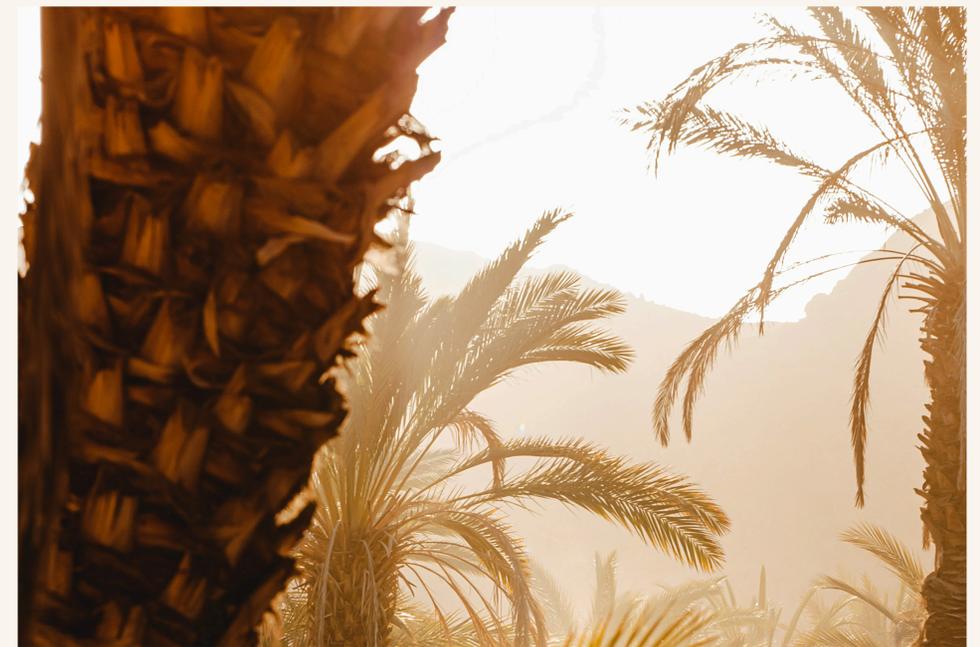

Date palm cultivation requires high organic matter, good soil aeration, and balanced nutrition. Our cow dung-based organic fertilizers are specially suitable for date farms in Middle East, Africa, and Asia.

Benefits for Date Palm Farming:

Improves root zone microbial activity - Increases fruit setting and bunch weight - Enhances tolerance to drought and salinity - Improves soil structure in sandy desert soils - Supports organic and residue-free farming.

Typical Dosage for Date Palms:

Young plants: 2–3 kg per tree per year **Mature trees:** 5–10 kg per tree per year, applied in two split doses

Export & Logistics Capability

We supply bulk quantities to international buyers with reliable export documentation, phytosanitary certification, and flexible shipping options (FOB, CIF, CFR). We handle container loading, fumigation, and customs documentation.

Markets We Serve:

- Middle East (UAE, Saudi Arabia, Oman, Qatar, Bahrain) - Africa (Egypt, Morocco, Kenya) - Southeast Asia - Europe for organic projects
